Summary

I have 5+ years experience working with Python. I am very passionate about data and learning by developing projects.

I have built personal projects that involved web-scraping, data cleaning, data analysis, data visualizations and some Machine learning approaches.

Finally I built and launched Wizemart; a Flask website that uses Google cloud platform to help users find good deals from the best sellers on jumia. I am always looking for a challenge to learn new things and improve.

Experience

Data Scientist

Sep 2021 - Present (5 months +)

Student Intern

Baze University

Oct 2020 - Dec 2020 (3 months)

Analyzed school's hospital plans in order to find optimum locations where sockets and internet ports should be set up.

Analyzed the schools security camera set up.

Developed SQL database schema in a group with other interns Organized/attended weekly meetings to analyze all interns progress

Troubleshooting computers in school's labs

Education

Baze University

Bachelor's degree, Computer Science

2018 - 2021

Licenses & Certifications

What is Data Science? - Coursera

Tools for Data Science - Coursera

3X5F363B7ARG

Data Science Methodology - Coursera

NCG287P2E4GT

Python for Data Science, AI & Development - Coursera

T69VY7FKC9HQ

Database Design and Programming with SQL - Oracle

Skills

Python (Programming Language) • Full-Stack Development • Tableau • Git • Flask • IT Consulting •
Jupyter • Data Science • Statistics • Java
